FrontEnd Web Developer

Dear Hiring Manager,

My 3 years of experience as a Front End Developer has made me well-positioned for your requirement for Front End Web Developer. I am finely honed in HTML5, CSS3, Javascript and other frameworks such as React and Three JS to make the web pages mobile-friendly and responsive in nature. Below are the major responsibilities, I take care of:

- Identify web page design.
- Select a design that enhances the user experience.
- Develop web enhancing features.
- Optimize web applications for different digital devices such as tablets, desktops, smartphones, etc.
- Storing reusable codes to utilize in the future.

Furthermore, I am well-versed with a cross-team collaboration approach to prepare a stellar and faultless product. I am a detail-oriented professional that helps me resolve the problem at hand.

I want to thank you for gauging my potential for the role. My enclosed resume will share more details on my academic qualifications and employment background. I am hoping to further discuss the role responsibilities in detail with you.

Sincerely,
Joshua Farai Hoko
